Press Release

WOODY WAGOON™ WELCOMES THE VW NEW BEETLE TO THE WOODY FAMILY

The Woody II Kit by Woody Wagon™ is the ultimate re-styling package for the new VW Beetle. The authentic-look wood trim adds a “modern” nostalgic twist to this popular successor to the original Beetle. It is sure to be the center of attention wherever it goes. Produced with the same attention to detail from the same quality materials as our famous Woody Wagon™ “wood” kits, the raised quarter-round outer molding and simulated planking creates a true 3-dimensional light and dark surface that duplicates the original “Woodys” construction.

Designed to be easily installed by the home enthusiast, all components are shipped ready to install and require no trimming or fabrication. The detailed instructions with extensive photos make installation a simple matter of following directions. Call today for the location of your local retailer or installer, or to order direct.

All kits are shipped ready-to-install. The detailed instructions are designed for the first-time installer or your local aftermarket installer for a fast, trouble-free installation and consist of two manuals, text and photos. Even if you need a hand, tech help from Woody Wagon’s professional installers is just a phone call away - whether a first-time installer or a savvy professional. Hundreds of home enthusiasts-even an 80-year-old grandmother, have installed our kits!

Produced from ISO 9001 manufactured materials featuring an application-specific 3M attachment system (adhesive backing) and quality simulated wood materials.
